

NW 9/5/59 House 2942/24/59 Temperature 3/60

population 6/60 - 286 (8 in 5 months), inc. birds to lat.
side of 7/60 of injured chicken to lat - broken shell -
indicated effect of disturbance on them.

went into early moult. Production for period beginning
6/60 ~~at least~~ 15% below what it should have
been. (Example of adult birds - 10th month prod.
70%, this one 54%; 11th 63% vs. 44% 12th 61% vs. 38%
13th month vs 71.4. compare with 5th month of
UE hatched 7/7/60 89.5

Figure 11.5 month production, through 8/61, then
~~10 months beginning~~ next seven months of
note of second year of lay. at pine park
taken, 10/15/61, 187 left. 120 added U.W. (where pop. had
been 100) & 59 to barn (where pop. had been 129)
may not be possible to remove 3 months of lay in barn.
only 8 of these lost until 10/16/61 should not be removed
or losses.

Population 2nd 4/61 - 249 chicks / 37 depletion - too many
